

A man in a dark suit and tie is holding a silver Philips dictation device to his mouth. He is looking directly at the camera with a slight smile. In the background, a woman in a patterned dress is standing near a window, looking down at a device in her hands. The scene is set in a modern office with large windows.

PRODUCT OVERVIEW	

WE CONNECT PEOPLE AND TECHNOLOGY

We believe in the power of simplicity. Our solutions are developed to make your dictation workflow user-friendly to improve your day-to-day working life by streamlining the communication between the author and the typist. With speech-to-content solutions from Philips, the needs of all users in a dictation environment are met. Our outstanding reputation for quality and reliability has made us number one in the professional dictation market. Philips is the only full solution provider for all speech-to-content needs, such as software, hardware, and services. Practical technology, sophisticated yet simple, allows you to enhance your working environment and simply work smarter.

From the no. 1
in professional dictation

SOLUTIONS TO ENHANCE YOUR BUSINESS

Our sophisticated solutions offer businesses quality they can rely on, enhancing their office workflows significantly. By shortening document turnaround times, our software further streamlines communication between author and typist. It redefines the role of dictation in your organization.

ANALOG VERSUS DIGITAL

By changing over to a digital dictation workflow, companies can achieve efficiency increases of up to 25%. Digital dictation shortens organizational processes thanks to automatic forwarding of the voice file and makes it easier to edit dictations.

STREAMLINE YOUR WORKFLOW

SpeechExec software solutions from Philips let you decide for yourself how you want to work. Use our latest technologies to your advantage and work easily and intuitively. Take the pressure off your team by speeding up your document creation processes.

PRODUCT HIGHLIGHTS

EFFICIENT WORKFLOW MANAGEMENT
The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.

PRIORITY SETTING
With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.

EASY WORK TRACKING
SpeechExec provides clear information about the current status of your dictation jobs. It lets you track your work and delivers real-time information, even if transcription is still pending or is already in progress.

AUTOMATIC DOWNLOAD
When plugged in, the dictation device automatically uploads your audio files directly onto the computer and into the SpeechExec dictation workflow.

GEARED FOR SPEECH RECOGNITION
The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech recognition software guarantee superb audio quality, high recognition accuracy, and easy hardware administration.

PERFECT COMPANION
Philips SpeechExec Pro dictation software is the perfect companion for the SpeechMike dictation microphone. Control all recording features intuitively with your thumb.

DATA SECURITY AND BACKUP
File encryption and secure file transfer allow only authorized individuals to access your documents. The optional automatic backup function protects your data against accidental loss.

WEB UPDATES AND LICENSING
The automatic software update option and the state-of-the-art web based licensing keep the SpeechExec Pro workflow software up-to-date at all times - without the hassle of having to check for a new version, download and install manually.

DSS PRO ENCODING
The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate and reduce file size, network traffic, and required storage capacity. The format also allows additional information, such as client/ patient name or document type, to be stored in the file header, further facilitating file organization.

SpeechExec transfers the dictation files to the right destination, supports the transcription process, archives and organizes the documents, and sends them back to the predefined targets.

INNOVATIVE VOICE PROCESSING

In many companies, rapid changes are occurring in the area of mobility. Studies have shown that a third of working hours now occur outside of the workplace. We have designed our dictation products and solutions in line with this trend. Enjoy your freedom, even when dictating.

PROFESSIONAL DIGITAL TRANSCRIPTION

SpeechExec provides you with a transcription management platform that unites workflow automation, transcription features, and speech recognition in one seamless solution. Creating a smooth and future-proof working environment in all documentation-intensive businesses has never been easier.

PRODUCT HIGHLIGHTS

	EFFICIENT WORKFLOW MANAGEMENT The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.	PRIORITY SETTING With the included priority-setting option, urgent recordings can be prioritized. This guarantees that important dictation files will be identified at a glance and get processed and delivered first.	
	WEB UPDATES AND LICENSING The automatic software update option and the state-of-the-art web-based licensing keep the SpeechExec Pro workflow software up-to-date at all times – without the hassle of having to check for a new version, download it, and install it manually.	INDIVIDUAL SORT AND FILTER OPTIONS SpeechExec Pro Transcribe enables users to search for specific dictation files or filter their dictation list by user-definable criteria. Furthermore, the easy-to-use list-sorting options for single and multiple dictations guarantee a quick overview of dictation files.	
	KEYBOARD SHORTCUTS Philips SpeechExec Pro Transcribe incorporates useful keyboard shortcuts. These keystroke combinations make the control of the workflow software easy, quick, and convenient.	DATA SECURITY AND BACKUP File encryption and secure file transfer via SSL allow only authorized individuals to access your documents. The optional automatic backup function protects your data against accidental loss.	
	SEAMLESS INTEGRATION Philips SpeechExec 7.0 Pro Transcribe can be seamlessly and easily integrated into existing Philips digital dictation solutions such as the professional transcription set.	CAROUSEL VIEW For typists who want to concentrate on getting jobs done one after another, the new SpeechExec Pro Transcribe carousel view option provides a quick and fast overview of the most relevant information. The carousel window displays all dictation files as dictation cards. Every dictation card represents one dictation showing at a glance information on the user, status, priority, and other dictation properties.	
	GEARED FOR SPEECH RECOGNITION The seamless integration of Philips dictation recording devices and the direct interface to Dragon NaturallySpeaking Professional speech recognition software guarantee superb audio quality, high recognition accuracy, and easy hardware administration.		

THERE IS A NAME FOR DESKTOP DICTATION: SPEECHMIKE

Listening to the feedback of our partners and professional users has made the Philips SpeechMike the accepted standard for digital PC dictation – in both small offices and large organizations operating around the globe. With its ergonomic design and the incorporation of the latest technological advancements, Philips has once again positioned the SpeechMike at the forefront of professional digital dictation.

FOR MORE THAN 50 YEARS

From the beginning, Philips was a driving force in the development and production of innovative dictation and voice technologies. Digital dictation and efficient document creation help companies save time and money. Philips is the number one in professional dictation worldwide for good reason.

ERGONOMIC. INNOVATIVE. RELIABLE.

The Philips SpeechMike Air is specifically designed to meet the tough challenges of document-intensive professions. It represents the perfection of desktop dictation, no longer restraining it by a cord. The pure, timeless design, its outstanding ergonomics, and the sophisticated functionality in conjunction with superb recording quality make it a milestone in professional dictation.

PRODUCT HIGHLIGHTS

**SPEECHEXEC PRO SOFTWARE**

The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist. Additionally it allows you to monitor the status of your work at any time.

**INTEGRATED TRACKBALL**

The Philips SpeechMike Air offers an integrated trackball that allows the user to easily navigate through documents and files without using a mouse.

**NOISE-CANCELING MICROPHONE**

The superior microphone reduces background noise and is optimized for speech recognition. The built-in headset socket allows you to attach the noise-canceling headset for hands-free recording and even more accuracy in a noisy environment.

**ERGONOMIC ZONES DESIGN**

Designed with three ergonomic zones, it has been tested and proven by users to have the most comfortable fit in the human hand. The dictation zone is optimized to keep thumb movement to a minimum and allows for blind operation. The buttons needed for the actual dictation functions take up the greatest amount of space in the central area of the device. Less frequently needed function buttons are clearly arranged above and below. The trackball uses a laser sensor that allows precise cursor movements. It contains an integrated confirmation button for simple control of PC functions and can also be used to control playback volume.

CRYSTAL-CLEAR PLAYBACK

The advanced built-in front speaker and the integrated sound card guarantee crystal clear playback of your dictation files.

GEARED FOR SPEECH RECOGNITION

The SpeechMike features preconfigured buttons for direct control of Dragon NaturallySpeaking, the voice recognition solution from Nuance.

READY FOR INTEGRATION

Philips provides a software development kit (SDK) for speech, office, and business application developers that allows for convenient programming of interfaces when integrating the SpeechMike into professional information and dictation solutions.

WIRELESS DICTATION

On top of the unparalleled wireless user experience, the SpeechMike Air features high connection reliability, low power consumption, and an expedient data transfer rate. The AirBridge and AirPort form the interface between SpeechMike Air and the PC. The AirPort docking station provides convenient charging of the dictation microphone, while the AirBridge serves as the PC connection. Voice data is encrypted and securely transferred from up to 33 feet away. While traveling or at home, simply attach the AirBridge to your laptop and continue working.

BOOST YOUR PRODUCTIVITY

The professional SpeechMike USB microphone takes stationary dictation to a new level. It delivers excellent speech recognition capabilities, an antimicrobial surface for improved hygiene, and refined ergonomics for easy operation.

43 % LOWER ENERGY CONSUMPTION

The SpeechMike USB dictation microphone is a milestone in professional dictation. Besides having outstanding technical characteristics, the product is also an environmental trailblazer. The new version has an impressive 43 % lower energy consumption, 51 % reduction in packaging materials, and 16 % reduction in product weight.

PRODUCT HIGHLIGHTS

NOISE-CANCELING MICROPHONE

The advanced microphone design and an optimized frequency response rate cater for the best speech recognition results.

ANTIMICROBIAL SURFACE

The antimicrobial surface is important for use in a clinical environment. This feature was achieved by adding a substance to the plastic that impedes the reproduction of microorganisms, thus improving hygiene.

INTEGRATED BARCODE SCANNER

Link client or patient data to a recorded file simply by scanning a bar code. The scanned information is automatically attached to the dictation file, streamlining the documentation process. All identifying information is entered accurately, increasing security and potential for cost savings.

ERGONOMIC ZONES DESIGN

Designed with three ergonomic zones, it has been tested and proven by users to have the most comfortable fit in the human hand. The dictation zone is optimized to keep thumb movement to a minimum and allows for blind operation. The buttons needed for the actual dictation functions take up the greatest amount of space in the central area of the device. Less frequently needed function buttons are clearly arranged above and below. The trackball uses a laser sensor that allows precise cursor movements. It contains an integrated confirmation button for simple control of PC functions and can also be used to control playback volume.

GEARED FOR SPEECH RECOGNITION

The SpeechMike features preconfigured buttons for direct control of Dragon NaturallySpeaking, the voice recognition solution from Nuance.

CRYSTAL-CLEAR PLAYBACK

The advanced built-in front speaker and the integrated sound card guarantee crystal-clear playback of your dictation files.

READY FOR INTEGRATION

Philips provides a software development kit (SDK) for speech, office, and business application developers that allows for convenient programming of interfaces when integrating the SpeechMike into professional information and dictation solutions.

SPEECHEXEC PRO DICTATION SOFTWARE

The dictation management software SpeechExec Pro Dictate allows the seamless and flexible integration of dictation, transcription, and voice recognition in a single application. Dictation files and documents recorded with the SpeechMike can be sent by e-mail, uploaded to an FTP server, or archived in the company network – even in encrypted form. User-friendly functions allow for clear and transparent organization of the recordings and the implementation of an efficient document workflow.

PROFESSIONAL DICTATION ON THE GO: POCKET MEMO

The increasingly mobile business community, growing volumes of documentation, and the pressure of rising costs make digital dictation crucial for law firms, hospitals, and other professional businesses. Our range of portable dictation solutions is engineered to perfectly adapt to your organization's requirements, thus enabling you to optimize your workflow and enhance productivity.

FORM FOLLOWS FUNCTION

Philips Design is one of the largest design organizations in the world. In the ranking tables of International Forum Design Hannover, Philips takes a place at the top with its product designs and innovations.

COMMITTED TO
YOUR BUSINESS

The Philips Pocket Memo digital recorder sets new standards in advanced functionality and style. The ergonomically shaped light-weight metal body is ideal for working over longer periods of time, and the intuitive one-thumb operation offers unparalleled user-friendliness. Coupled with SpeechExec Pro software for efficient data management and a docking station for uploading your files, going from your voice to your text document has never been quicker.

PRODUCT HIGHLIGHTS

SPEECHEXEC PRO SOFTWARE
The SpeechExec Pro software organizes the workflow of dictation files and resulting documents between author and transcriptionist, and allows you to monitor the status of your work.

SLIDE-SWITCH OPERATION
With the professional slide switch, you don't have to change your working habits and can enhance your dictation workflow. It offers a fast response and is designed for single-handed operation.

PROFESSIONAL EDITING FUNCTIONS
Easy and quick file editing (insert, overwrite, append) via convenient slide-switch operation.

DSS PRO ENCODING
The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate and reduce file size, network traffic, and required storage capacity. The format also allows additional information, such as client/patient name or document type, to be stored in the file header, further facilitating file organization.

SMART BUTTONS
Two "smart buttons" let you scroll through the menu options and quickly make selections. Navigating through the menu to assign work types and other commands is fast and intuitive.

FILE ENCRYPTION
The Philips Pocket Memo uses technology to encrypt dictations in real time. Furthermore, it can be protected against unauthorized use or file playback by assigning your personal identification number.

VOICE COMMANDS
Assign job data such as keywords simply by saying them. This increases efficiency and minimizes the probability of errors.

HIGH-QUALITY MICROPHONE
The unique high-quality built-in microphone delivers increased recording sensitivity and enhanced sound quality.

USB DOCK
The Pocket Memo digital recorder can be fast charged through the USB connection to your PC. This gives you the assurance that your recorder will always be ready to work when you are. Furthermore, your files will be transferred to your PC automatically.

FOCUS ON WHAT'S IMPORTANT

Specifically tailored to professionals' needs, the Pocket Memo 9500 dictation recorder's advanced design and technology ensure crystal-clear sound quality and unparalleled ease of use – all packed into a robust full metal casing. With the included SpeechExec Pro Dictate software, a simple integration into your everyday document workflow is guaranteed.

SIMPLY THOUGHT THROUGH
For Philips product developers, appealing to the intuitive senses of the user is always of great importance. The Pocket Memo 9500 dictation device has a wonderful feel and can be operated with one hand thanks to a four-position slide switch.
